Hallwang, 21.01.2020

To whom it may concern,

I am writing to recommend the services of Mr. Łukasz Dywicki sole owner and consultant at Code-House. The emax-it is a cross-sector IT consulting company. We advise companies and institutions from a wide variety of industries. Our competencies range from software architecture consulting and testing, software development, operation and testing to IT strategy development.

As experts in the software sector, we develop and implement advanced solutions with modern technologies. Our many years of experience in the successful implementation of complex projects make us a recognized partner for companies operating worldwide. Portfolio of our customers includes retailers, insurance institutions, banks and others with headquarters in Germany, Austria, and other countries.

Mr. Dywicki supported us in one of our projects happening in 2019 for a big retailer. Łukasz worked hard with a customer helping with the design of end solution architecture and its implementation as well as professional documentation. Project involved complex aspects of open source customisations: writing complete set of extensions in Java for login and registration, look & feel adjustments leading to integration of OAuth and OpenID Connect standards with in-house supplier database. We as well as our customer believe that we received remarkable service which exceeded our expectations. Service quality was so good that our customer decided to prolong the contract so Łukasz could provide additional support and advice towards the deployment of the project within the organization.

We have found Łukasz strong commitment into the technical field let our customer offload own staff, great quality of contribution and smooth communication with the team and other third party contractors. His programming abilities proved to be great. Any spotted bugs were always addressed in the time.

In closing let us say I have no hesitation in recommending Łukasz's services. I believe that he is able to deliver what he promises in a timely, cost-effective manner and more importantly predictable manner. Please contact us if you have any questions or would like to further discuss his qualifications.

Best regards,

Alexander Simon

Chief Executive Officer (CEO) and Founder of emax-it Informationstechnologie GmbH
